ACHIEVEMENT BOOSTER RULES

GOLDEN BOOK

BY GAETANO CAVALLARO

During setup, place the 9 Golden cards face up near the Library deck to form the Golden display. Moreover, place the Homunculus token near the Golden display.

9 Golden cards

During their turn, players can draft a card from the Golden display to play it face up on their Active Shelf by following the base game placement rules.

1 Homunculus token

Additionally, after placing a Golden card, the player can place a second card from their hand if the card matches the number of the recently placed Golden card.

When a player places a Golden card on their Active Shelf, they will immediately get the Homunculus token from either the center of the table or another player's Shelf, and place it in the "x2" Multiplier Space by eventually pushing any mixture token one Multiplier Space to the right.

When a player loses the Homunculus token due to another player placing a Golden card, while having at least one Mixture token in the Shelf, the empty "x2" Multiplier Space where the Homunculus token was, will still be considered occupied for game scoring.
